

Lima, May 11, 1956

Dr. William Dameshek,
New England Center Hospital,
Harrison Ave. and Bennet St.,
Boston 11, Mass.

Dear Bill :

Your letter of May 3 has been received. Merino cannot travel to Boston but Reynafarje is willing to do it, on the basis of the financial help of \$ 500 you mention in your letter. Reynafarje has been working almost exclusively in highaltitude polycythemia during recent years and is well acquainted with its different aspects, including the results obtained with the use of Fe⁵⁹, etc.

Kindly let me know if you agree with this trip of Reynafarje, and what kind of collaboration would you like to have from him : presentation of a paper, round table discussion, limitation to a definite aspect, etc., and in either case what time will be allowed to him?

With best regards,

Alberto Hurtado
