Doctor Alberto Hurtado
Sub Director
Instituto de Biologia Andina
Lima, Peru

Dear ~~Doctor~~ ^{Alberto} Hurtado:

In accordance with our previous letter I should like to have a summary of the hematologic activities of your country during the past year.

This may be in the form of a News Letter which will discuss informally the most important work going on in your country perhaps with a few references to the outstanding articles published. Or, you might wish to make it a more formal abstract of your country's hematologic literature during the past year.

In any event we should like about four pages which will correspond to about 8-10 double spaced typewritten pages.

The deadline for your contribution is
May 20, 1951.

With best regards, I am,

Sincerely yours,

William Dameshek, M.D.
