Dr. Alberto Hurtado, Dean
Faculty of Medicine,
Lima, Peru.

Dear Doctor Hurtado:-

It was a pleasure to meet you at the recent meeting of the Pan American Congress of Pediatrics.

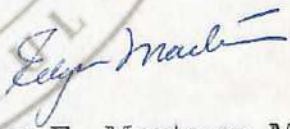

You are to be congratulated upon the fine work you are doing to improve medical education at your institution.

The many changes which are taking place in medical education throughout the world are being achieved through the efforts of dedicated men like you working diligently to improve medical education and the medical care of all people.

One of the important functions of the American Academy of Pediatrics is to help in any way possible to improve medical education throughout both Americas.

I would appreciate any suggestions you may make as to how we can be of assistance in the problems of medical education in South America.

Yours sincerely,

Edgar E. Martmer, M.D.
