Dear Doctor Hurtado:

Enclosed is a copy of "Inquiry...", a publication of Pennsylvania State University describing some research on the aspects of high altitude on athletes. I wonder if some of your studies might add to the information obtained from the Pennsylvania State University. As I told you over the phone when you were in Washington, we should like very much to relate some of your findings to the problems athletes will encounter in adjusting to the altitude of Mexico City during the 1968 Olympic Games. I shall be most grateful for any information you can give us.

Sincerely,

~~Helen Neal~~
