Dr. Alberto Hurtado
Avenue Brasil 2168
Lima, Peru

Dear Alberto:

I am writing to tell you that a friend of ours and a very important man in our hospital set-up namely Mr. Sidney W. Davidson of New York City is planning on a visit to Peru in March. Mr. Davidson has been Chairman of the Board of Trustees of our New England Center Hospital for several years and has been its prime activating force. He is also a Trustee of many universities and industries including Yale University, the Boston Globe (a newspaper) etc. etc. He and Mrs. Davidson are coming to Peru by the Grace Line ship Santa Cecilia on March 13 and will then go directly to the Bolivar Hotel. They are planning to be in Peru for a 2-week period and in that time have in mind going to Cuzco by plane. Since Mr. Davidson is in the age group above 60 and since the planes were not pressurized when I took them, you might advise him as to what the present conditions are etc. He is of course anxious to see Cuzco, Machu-Picchu and of course Lima and its environs. I hope that you will plan to contact him at some time during his stay preferably in the early day or so after his arrival, and anything that you can do for him I will greatly appreciate. Many thanks for this and I hope to reciprocate with you at some future time.

Sincerely yours,

Bill

William Dameshek, M.D.
